

Quang Truong

PH.D. CANDIDATE · MACHINE LEARNING

✉ cong.minh.quang.truong.th@dartmouth.edu | 🏠 quang-truong.github.io | 📧 quang-truong

Research Interests

Graph Machine Learning, Computational Topology, Data Mining, Machine Learning

Education

Dartmouth College

Ph.D. in Engineering

- GPA: Equiv. to 4.0/4.0

Hanover, NH

Sep. 2022 - Present

Texas Christian University (TCU)

B.S. in Computer Science, Minor in Mathematics

- GPA: 3.96/4.0
- Summa Cum Laude

Fort Worth, TX

Jan. 2019 - May 2022

Mississippi State University (Transferred to TCU in Spring 2019)

B.S. in Computer Science

- GPA: 4.0/4.0

Mississippi State, MS

Aug. 2017 - Dec. 2018

Research Experience

pyt-team

Contributor

Aug. 2023 - Present

- Initiate the development of Path Complex package for the TopoNetX library.
- Author a comprehensive Jupyter Notebook tutorial to facilitate easy adoption and understanding of Path Complex within the Topological Deep Learning (TDL) community.
- Conduct a collaborative research with the TDL community on a general-purpose topology library, which will be submitted to the Journal of Machine Learning Research (JMLR).

LISP Lab, Dartmouth College

Ph.D. Candidate (Advisor: **Peter Chin**)

Hanover, NH

Sep. 2022 - Present

- Pioneer a novel branch of TDL that relies on simple paths, which significantly enhance generalizability of Topological Graph Neural Networks.
- Prove that the Path WL test inherits and generalizes theoretical properties of Simplicial WL and Cell WL tests.
- Develop Path Isomorphism Network, a state-of-the-art TDL model, which achieves remarkable results on PROTEINS (78.8%), NCI1 (85.1%), NCI109 (84.0%), and IMDB-B (76.6%).
- Engineer a spatio-temporal Graph Neural Network (GNN) tailored for the detection of anomalous trajectories within giga-graphs with more than 1 million nodes and edges.

Vision Lab, University of Illinois at Chicago

Research Intern (Advisor: **Wei Tang**)

Chicago, IL

May 2021 - Feb. 2022

- Innovated a context-aware 3D object detection architecture, underpinned by a self-attention mechanism via non-local blocks, that captures object-wise and object-context relationships.
- Enhanced model performance by incorporating contrastive learning techniques to align allocentric, egocentric, and semantic feature embeddings.

ML Lab, Texas Christian University

Undergraduate Research Assistant (Advisor: **Bo Mei**)

Fort Worth, TX

May 2019 - May 2021

- Architected a Vehicle Re-identification pipeline empowered by Generative Adversarial Networks (GANs) for adaptive domain learning.
- Derived a novel filtering algorithm that substantially reduces the number of training samples without sacrificing performance.

Selected Publications

- [1] Generalizing Topological Graph Neural Networks with Paths
Quang Truong and Peter Chin. **2023**
Under review at AAAI 2024. arXiv: 2308.06838 [cs.LG].

- [2] Not All Data Matters: An Efficient Approach to Multi-Domain Learning in Vehicle Re-Identification
Quang Truong and Bo Mei. **2021**
2021 IEEE International Intelligent Transportation Systems Conference (ITSC), pp. 1278–1285. DOI: 10.1109/ITSC48978.2021.9564945.
- [3] Image-based Vehicle Re-identification Model with Adaptive Attention Modules and Metadata Re-ranking
Quang Truong, Hy Dang, Zhankai Ye, Minh Nguyen, and Bo Mei. **2020**
The Boller Review. TCU Press. DOI: 10.18776/tcu/br/5/130.

Presentations

Oral Presentations

- Not All Data Matters: An Efficient Approach to Multi-Domain Learning in Vehicle Re-identification, *IEEE 24th International Conference on Intelligent Transportation Systems (ITSC)*. **2021**
- Domain-invariant Network for Vehicle Re-identification, *Annual Industrial Board Meeting of TCU Department of Computer Science*. **2020**

Poster Presentations

- Generalizing Topological Graph Neural Networks with Paths, *Computational Cybersecurity in Compromised Environments (C3E) Workshop*. **2023**
- Domain-Invariant Learning in Vehicle Re-identification, *TCU Student Research Symposium*. **2021**
- AI-2-Go, *TCU Student Research Symposium*. **2019**

Honors

Grants

- Research Grant for Domain-invariant Network for Vehicle Re-identification (\$1471), *TCU SERC Undergraduate Research Grant*. **2020**
- Research Grant for AI-2-Go (\$1500), *TCU SERC Undergraduate Research Grant*. **2019**
- Research Grant for Housing Price Prediction (\$1500), *TCU SERC Undergraduate Research Grant*. **2019**

Awards

- VEF Fellow, *VEF 2.0 Program, VEF Fellows and Scholars Association*. **2021**
- Vingroup Scholarship Recipient, *Master's & Ph.D. Scholarship Program, VinUniversity*. **2021**
- Best Undergraduate Research Poster, *TCU Student Research Symposium [URL]*. **2019, 2021**
- TCU Scholar, *Texas Christian University*. **2020, 2021**
- Dean's List, *Texas Christian University*. **2019-2021**
- Bronze Medal, *ACM-ICPC South Central USA Regional Contest [URL]*. **2019**
- 1st Prize, *Calculus Bee [URL]*. **2019**
- Transfer Faculty Scholarship (\$196,000 for four years), *Texas Christian University*. **2019**
- President's Scholar, *Mississippi State University*. **2017, 2018**
- Freshmen Academic Excellence Scholarship (\$54,000 for four years), *Mississippi State University*. **2017**

Skills

Programming	Python, C/C++, Java, SQL, R, Scala
Machine Learning	Pytorch, Pytorch Geometric, NetworkX, TopoNetX, Pytorch Lightning, Hydra, WandB, Scikit-learn, Tensorflow, Keras, Matplotlib, Numpy, Pandas

Relevant Coursework

Engineering	Signal Processing, Fourier Transforms and Complex Variables, Statistical Methods in Engineering
Computer Science	Deep Learning, Data Mining and Visualization, Analysis of Algorithm, Operating Systems, Object-oriented Programming, Database Systems, Programming Language Concepts
Mathematics	Mathematics for Machine Learning, Game Theory, Applied Linear Algebra, Probability, Statistics, Discrete Mathematics, Calculus
