Professional Summary

Ph.D. student with 4+ years of experience in developing scalable advanced Machine Learning (ML) solutions, focusing on Graph ML, Recommendation Systems, AutoML, and Relational Deep Learning. Highly proficient in major ML frameworks such as Pytorch and Tensorflow. Strong software development skills with 7 years of experience in Python and C/C++ with prior records of open-source contributions. A proven track record of publishing and reviewing research papers in renowned ML journals and conferences such as AAAI, JMLR, TKDD, ICLR. Actively seeking an ML internship from May 5th, 2025 to August 23rd, 2025.

Education

Michigan State University <i>Ph.D. in Computer Science</i>	<i>East Lansing, MI</i> <i>Aug. 2024 - May 2028</i>
Dartmouth College <i>M.S. in Engineering Sciences</i>	<i>Hanover, NH</i> <i>Sep. 2022 - Jun. 2024</i>
Texas Christian University (TCU) <i>B.S. in Computer Science, Minor in Mathematics</i> Honors: <i>Summa Cum Laude</i>	<i>Fort Worth, TX</i> <i>Jan. 2019 - May 2022</i>

Selected Publications

‡ indicates equal contribution.

- [1] TopoX: A Suite of Python Packages for Machine Learning on Topological Domains
Mustafa Hajji‡, Mathilde Papillon‡, Florian Frantzen‡, ... **Quang Truong**, and ... Nina Miolane. **2024a**
The Journal of Machine Learning Research (Volume 25).
- [2] Weisfeiler and Lehman Go Paths: Learning Topological Features via Path Complexes
Quang Truong and Peter Chin. **2024b**
AAAI'24: The 38th Annual AAAI Conference on Artificial Intelligence.
- [3] Not All Data Matters: An Efficient Approach to Multi-Domain Learning in Vehicle Re-Identification
Quang Truong and Bo Mei. **2021**
ITSC'21: The 24th IEEE International Conference on Intelligent Transportation Systems.

Open-source Projects

TopoNetX

- Provides reliable and user-friendly building blocks for computing and machine learning on topological domains that extend graphs.
- Starred 150+ times on GitHub.
- Published at the Journal of Machine Learning Research (JMLR).

Skills

Programming	Python (Expert), C/C++ (Advanced), Java (Proficient), R (Proficient), MATLAB (Proficient)
Machine Learning	Graph Machine Learning, Relational Deep Learning, Knowledge Graphs, Recommendation System, Computer Vision, Natural Language Processing, Distributed Data Parallel
ML Frameworks	Pytorch, Pytorch Geometric, Pytorch Frame, NetworkX, TopoX, Pytorch Lightning, LangChain, Hugging Face, Scikit-learn, Tensorflow, Keras, Matplotlib, Numpy, Pandas
DevOps	WandB, Docker, Singularity, Pytest, Amazon Web Services (AWS), Google Cloud Platform (GCP)
Software Engineering	Spring, Agile, JIRA, SCRUM, Git, Linux/Unix, MongoDB, DuckDB, MySQL

Research Experience

DSE Lab, Michigan State University <i>Doctoral Research Assistant (Advisor: Jiliang Tang)</i>	<i>East Lansing, MI</i> <i>Aug. 2024 - Present</i>
• Designing production-level GNN architectures to perform node classification, link prediction, and temporal forecasting tasks on relational databases across multiple nodes.	

LISP Lab, Dartmouth College

Graduate Research Assistant (Advisor: **Peter Chin**)

Hanover, NH

Sep. 2022 - Jun. 2024

- Introduced a novel approach to Topological Deep Learning (TDL) leveraging simple paths, significantly enhancing graph expressivity and surpassing the theoretical limitations of the 3-WL test.
- Developed Path Isomorphism Network, a state-of-the-art TDL model, which delivered outstanding performance on benchmark datasets: PROTEINS (78.8%), NCI1 (85.1%), NCI109 (84.0%), and IMDB-B (76.6%).

Vision Lab, University of Illinois at Chicago

Research Intern (Advisor: **Wei Tang**)

Remote

May 2021 - Feb. 2022

- Designed a context-aware 3D object detection architecture that captures both object-wise and object-context relationships, improving spatial understanding.
- Boosted model performance through cross-modality alignment, improving the feature representation of objects.

ML Lab, Texas Christian University

Undergraduate Research Assistant (Advisor: **Bo Mei**)

Fort Worth, TX

May 2019 - May 2021

- Developed an advanced Vehicle Re-identification pipeline utilizing Generative Adversarial Networks (GANs) for adaptive domain learning, resulting in a 10% improvement in mean Average Precision (mAP) over the baseline.
- Engineered a novel filtering algorithm that reduces the training data requirement by 25% while maintaining model performance, significantly improving computational efficiency.

Presentations

Invited Presentations

- Topologically-driven Neural Networks, *HPCC Special Seminar: Decoding Computational Challenges, the Advanced Institute of Interdisciplinary Science and Technology - HCMUT, VNU-HCM. 2024*

Conference Presentations

- Weisfeiler and Lehman Go Paths: Learning Topological Features via Path Complexes, *AAAI'24: The 38th Annual AAAI Conference on Artificial Intelligence. 2024*
- Not All Data Matters: An Efficient Approach to Multi-Domain Learning in Vehicle Re-identification, *ITSC'21: The 24th IEEE International Conference on Intelligent Transportation Systems. 2021*

Professional Services

Reviewer

- Conference Reviewer, *International Conference on Learning Representations (ICLR). Fall 2024*
- Journal Reviewer, *ACM Transactions on Knowledge Discovery from Data (TKDD). Fall 2024*

Teaching Experience

- Teaching Assistant, *ENGS 96: Mathematics for Machine Learning, Dartmouth College. Winter 2024*

Honors

Grants

- Research Grant for Domain-invariant Network for Vehicle Re-identification (\$1471), *TCU SERC Undergraduate Research Grant. 2020*
- Research Grant for AI-2-Go (\$1500), *TCU SERC Undergraduate Research Grant. 2019*

Awards

- VEF Fellow, *VEF 2.0 Program, VEF Fellows and Scholars Association. 2021*
- Vingroup Scholarship Recipient, *Master's & Ph.D. Scholarship Program, VinUniversity. 2021*
- Bronze Medal, *ACM-ICPC South Central USA Regional Contest [URL]. 2019*

Relevant Coursework

Engineering	Signal Processing, Fourier Transforms and Complex Variables, Statistical Methods in Engineering
Computer Science	Artificial Intelligence, Multi-modalities Generative AI, Network Science and Complex Systems, Deep Learning, Data Mining and Visualization, Analysis of Algorithm, Operating Systems, Database Systems
Mathematics	Mathematics for Machine Learning, Game Theory, Applied Linear Algebra, Probability, Statistics, Discrete Mathematics, Calculus
